

PLAN PAPER MILL FOR MACLEOD SOON—SAN FRANCISCO BROKER SAYS HE INTENDS TO FORM COMPANY

In a communication received by The Calgary Herald, Monday morning, July 22, Chas. S. Elms, timber and lumber dealer of San Francisco, states his intention to visit Alberta shortly for the purpose of formulating a company to build and operate a pulp and paper mill at Macleod for the utilization of timber lying west of that town.

Mr. Elms states that he estimates about \$1,500,000 would be sufficient to build the plant and provide operating capital. He hopes to acquire timber lands containing more than a half billion feet.

The greater part of the stock, he states, will be sold in and around New York City and the remainder will be sold in Alberta.

Mr. Elms says the plant should have a capacity of sixty tons of paper daily resulting in a net earning profit of \$25,000 monthly. He says there is sufficient timber on the tract to be acquired and adjoining tracts to operate an important plant for at least 100 years.

TRUTH IN ADVERTISING

A man was making out tickets and affixing them to the garments in a secondhand clothing store. Most of them were more or less conventional, such as "Misfit," "Not Claimed," "Tailor's Sample" and so forth, but one effort certainly claimed originality.

The central display in the window was a pair of trousers of startling cut and even more startling color. To this garment was affixed a card bearing the statement: "These Trousers Were Uncalled For."—Tit-Bits.

"The hours of leisure are the dangerous period in the boy's life," says John Hays Hammond. Again emphasizing the need for a profession of leisure.

WHEAT POOL ANNOUNCES SECOND INTERIM PAYMENT

A second interim payment on wheat delivered during the past crop year was announced by the Alberta Wheat Pool on Wednesday, July 31st. The basis of this payment is:

1 Northern	17½c
2 Northern	14c
3 Northern	13½c
4 Wheat	18½c
5 Wheat	12c
6 Feed Wheat	3½c
Tough 1 Northern	23c
Tough 2 Northern	20½c
Tough 3 Northern	18½c
Tough No. 4	22½c
Tough No. 5	16½c
Tough No. 6	7½c
Tough Feed	10½c

Besides the above, payments were made on something like eighty other grades ranging as high as 46½c on 5 Tough Snout wheat, to as low as 3c on broken wheat.

The total amount of the payment made by the Alberta Pool was over eight million dollars. There will be another payment during the coming fall.

Deductions for elevator and commercial reserves and for operating expenses, totalling 4c a bushel, have been made from the payment to members. This amount is slightly more than will be required but the exact figures will not be available for some time yet, at the end of the Pool's business year. When the final figures are available the excess will be refunded to members along with the final payment.

Taking every phase of the marketing year into consideration it must be admitted that this interim payment is on the whole a very good one. It may appear to some that the payment on No. 6 and feed wheat is proportionately small, but it must be remembered that when the initial payment on the higher grades was cut from \$1.00 to 85c last fall the

payment on No. 6 and feed wheat was cut only by 5c a bushel.

The 1928-29 crop year was a difficult one for the Canadian Wheat Pool because of the unusually heavy production the world over. Canada raised a record crop—about 520 million bushels—and Argentina, Australia and the United States all had very large crops of wheat.

Coming as it does at a time when crops generally are none too promising this Pool payment will be thrice welcome. The size of the payment will undoubtedly be a surprise to some for it was predicted during the low range of wheat prices in the spring that the Wheat Pool might possibly be unable to make any further payments.

On the new crop the Wheat Pool has announced the initial payment will be on the basis of \$1.00 a bushel.

FORD FAVORS FREE TRADE IN AUTOS

Washington, July 24.—Tariff developments have been marked by word from a representative of Henry Ford to the senate finance committee that the automobile manufacturer favored free trade in the auto industry. Ford went on record in response to an inquiry if any adequate reason prevails for the present 25 per cent. tax on autos.

OVERSOLD

A salesman sold an elderly Negro farmer a tractor. Some time after the machine was delivered, the salesman called on his customer for pay.

"Can you pay me for the tractor, Uncle Jim?" he asked. "Pay fo' de tractor?" he asked in astonishment. "Why, man, yo' done tole me dat in few weeks de tractor would pay fo' hisself."—Canning Trade.

Vacation: A short period during which you go broke trying to make strangers believe you couldn't.

IF MIXING STOPPED GRAIN WILL PASS THROUGH U. S. PORTS

Montreal, July 24.—(By Canadian Press.)—"If you stop all grain mixing in Montreal it will mean that United States grain will pass out through United States ports," C. B. Esdaille, a grain shipper of 41 years' experience, told the Saskatchewan grain commission at its session here today. Mr. Esdaille said he was chairman of the grain survey board. Standards for local grain, he said, were made in Toronto. Mr. Esdaille said that shipments of any grade of U. S. grain from Montreal were about equal in quality to the same type sent out of New York.

Canadian grain was sometimes used to tone up United States grain. Samples were mixed in his office, and after an examination if it is satisfactory the harbor commissioners were ordered to ship grain according to the mixed sample. Canadian grain was only used for mixing when the United States crop was poor. After samples were made they were sent abroad to the European buyers. As long as the buyers secured the right grade, they were not usually concerned with its origin.

Chief Justice Brown of the commission said that there was no reason why the inspection department should lower any of its standards or adopt practices used elsewhere.

Mr. Esdaille suggested that the lack of complaints seemed to justify the action.

United States grain passing through Montreal was found to contain more dirt than Canadian grain, and mixing of the two reduced the amount of foreign matter, in the opinion of Stanley Robb, deputy inspector in the port of Montreal.

Mr. Robb explained that the mixing process was adopted as a means of cutting down the percentage of dirt in the imported grain. The

amount of foreign matter, or "dockage," allowed by United States cities was 1.99 per cent, but anything above 2 per cent. was considered dirty.

The highest amount of dockage ever found in United States wheat was 3 per cent, and 10 cases of excess dockage were found in Montreal last month.

LABOR FROM EAST IS NOT REQUIRED FOR WESTERN CROP—DECISION MADE AT CONFERENCE HELD IN WINNIPEG

Winnipeg, July 25.—(By Canadian Press.)—"No labor will be required from Eastern Canada to harvest this year's crop in the west in view of the short crop, the heavy immigration movement this year, and the use of combine harvesters, it was decided at a meeting held here today by the Canadian Passenger association, attended by immigration, labor, provincial government and railway representatives.

The following statement was handed to the press by J. B. Parker, secretary: "In view of the short crop, heavy immigration movement this year, combine harvesters and threshers available, and on account of the labor available by reason of the general industrial and mining development in the west, it was decided that no labor would be required from Eastern Canada this year. The situation of the harvest will be taken care of by labor available in Western Canada."

CANADA'S POPULATION ESTIMATED 9,796,000—THIS SHOWS INCREASE OF MORE THAN A MILLION SINCE 1921

Ottawa, July 24.—(By Canadian Press.)—"Canada's total population stood at 9,796,000 as of June 1, 1929, according to an estimate issued this afternoon by the Dominion Bureau of Statistics. This is an increase of approximately 38,000 persons over the same date last year, when the estimated population was 9,658,000.

The report covering the years 1921-29 inclusive further showed the Dominion's population had increased by more than 1,000,000 persons during that period. In 1921 the census recorded 8,788,483 persons.

Comparative figures for census of this year, 1928 and 1921 follow in that order:

Prince Edward Island	86,100;
86,400; 88,615.	
Nova Scotia	559,400; 547,000;
523,837.	
New Brunswick	419,300; 415,000; 387,876.
Quebec	2,690,000; 2,647,000; 2,361,199.
Ontario	3,271,300; 3,229,000; 2,933,662.
Manitoba	663,200; 655,000; 610,118.
Saskatchewan	866,700; 851,000; 757,510.
Alberta	646,000; 631,000; 588,454.
British Columbia	591,000; 583,000; 524,582.
Yukon	3,000; 3,500; 4,157.
N. W. Territory	9,400; 9,200; 7,988.

FRENCH CABINET TENDERS RESIGNATION—PREMIER POINCARÉ'S HEALTH BREAKS DOWN; BRIAND TO SUCCEED

Paris, July 27.—The French cabinet presented their resignation collectively to President Doumergue this morning. Their action followed the resignation of Premier Raymond Poincaré to reconsider his own decision to resign due to an impending operation.

The premier's letter to President Doumergue sent last night read: "The fears that I expressed to you have been realized. It is impossible for me to be restored to health completely without a surgical operation, the preparations for which and the convalescence will condemn me to rest for two or three months."

"I cannot therefore, especially under the present circumstances, fulfill as I should the functions that you have been good enough to entrust to me the last three years, and I find myself, to my deep regret, in the necessity of presenting to you my resignation."

"I remain profoundly grateful to you for the good-will you never ceased to show me and I beg you to receive Mr. President, the renewed assurance of my respect."

"Raymond Poincaré."

Briand May Succeed
Mr. Briand probably will be asked tonight to form a cabinet. M. Briand, foreign minister, and M. Barthou, vice-premier, called at the home of Premier Poincaré at 10 a. m., to attempt to dissuade him from resigning as head of the government. They requested that he retain the nominal leadership although refraining from actual labor. The ministers remained with the premier half an hour and then went directly to the meeting of the cabinet which had been called to await their return.

Cabinet Bows to Decision

The cabinet's resignation was handed to President Doumergue, who presided at the meeting, by M. Barthou, acting premier, who drafted a letter reading as follows: "The efforts we have made with M. Poincaré to persuade him in the interests of his country to retain direction of public affairs, has not met with the result we had hoped. We must bow to his decision with the regret of not being able to continue a collaboration that was accompanied by our admiration and respectful devotion. Therefore we beg you as president, kindly to accept our resignation and express our profound respect."

The president, after the usual exchange of compliments, accepted the ministry's resignation, asking them to continue their work until a new ministry can be formed.

BRITAIN AND U. S. MAKE A START IN SOLUTION OF NAVAL PROBLEMS

London, July 24.—With the whole field of naval discussion between the U. S. and Britain having been surveyed by the premier and General Daves during the recent conversations in England, Premier MacDonald told the house of commons today that the two governments have made a fresh start in the solution of existing problems.

He made the important announcement that agreement had been reached upon the principle of parity, with a measure of elasticity to meet the requirements of the two nations.

The head of the new Labor government indicated he may visit Washington in October to confer with President Hoover for the purpose of advancing the ideals of disarmament and peace.

BLACK MONTH BRITISH NAVY FOR DISASTERS—EXPLOSION ON CRUISER WITH LOSS OF 16 LIVES ADDED TO MISFORTUNES

Valetta, Malta, July 27.—The British Admiralty has taken such a serious view of yesterday's latest disaster, the explosion in a gun turret on the cruiser Devonshire, that the dreadnought Queen Elizabeth, with the commander-in-chief of the Mediterranean fleet aboard, today was steaming at full speed to Volos, Greece, to hold an immediate inquiry.

The death of another marine during the night brought the number of fatalities up to 16, with nine injured. Loss of the submarine H-47, with 23 lives, on July 9, quickly followed by an explosion aboard the submarine X-1, and the bursting of an air bomb on the cruiser Vendictive, which killed one and injured two, together with yesterday's disaster, have made this month the blackest in many years in the British navy.

After the inquiry aboard the Devonshire the vessel will return to Malta and probably will be ordered to England.

The dead will be buried on Greek territory today. The injured are being brought to Malta aboard the hospital ship Maine.

A "Hush" Ship
London, July 26.—The cruiser Devonshire, which is one of the newest ships in the British navy, has a standard displacement of 10,000 tons. The Devonshire is the second of four ships of the 1925 cruiser program, and has been referred to as a "hush" ship, the greatest secrecy having been maintained by the admiralty as to certain of her features when she was launched in 1927.

The cruiser had been in an accident previously this year. Her stern was caught by the wind and tide, and she swung around, colliding with a lighter as she was being moved out of one of the docks at Devonport.

MISS-UNDERSTANDING

Browsing around the large assortment of Shakespearean works in the book department, the cultured individual was heard to murmur, "Tell me where is fancy bred?" To which an alert salesgirl replied, "Bakery goods on the main floor, sir."—Christian Science Monitor.

If he is 20 and she is 60, it's a love match, all right. But they love different things.

THE PROBLEM OF EMPIRE

The economic structure of the Empire is a subject that forms a constant topic of discussion just now in Great Britain. Plans for dealing with over-population, unemployment, and trade depression rarely omit a reference to the part that Empire development may not play in relieving the situation. There is little talk today about the glory and magnificence of the Empire as a political power in the world, and there is a great deal of talk about the money value of the Dominions and dependencies as markets for British commerce, and homes for surplus population.

The question came up in the House of Commons during the debate on the safeguarding duties a few days ago, when the value of this trade was emphasized by the statement that something like fifty per cent of Britain's export business was within the Empire, and the Conservative speaker urged the government to enlarge the scope of Imperial Preference, thereby welding the commonwealth into a real partnership in which every member would share the gains proportionately.

The economic consequences to the Dominions of Imperial Preference do not justify any further extension of this policy; Australian statesmen have so expressed themselves, and Canada has no intention of making more concessions unless she receives a fair measure of reciprocal treatment from Britain. Industrial and commercial development are matters of as vital importance to the welfare

of the Dominions as they are to Britain.

The British safeguarding duties were adopted as a temporary expedient, but the MacDonald Government has announced its intention of letting them lapse as the periods for which they were imposed expire. Britain clings tenaciously to the principle of free trade, while the Dominions are moderate protectionists. The existence of these divergent systems increases the difficulty of devising a scheme of imperial preference which would be mutually advantageous to all parties concerned. Protectionist nations have tariffs to bargain with, and may make trade treaties with one another that are profitable to both sides, but a free trade nation lacks this bargaining power in the framing of trade treaties, but it has been suggested that Britain should subsidize shipping for the carriage of Empire products in return for Dominion preferential tariffs.

The political genius of the British race is recorded in brilliant achievements extending over many centuries, and there is no reason to doubt that ways and means will be devised by which the great and varied resources of the Empire will be organized in closer unity to the glory and profit of all concerned, but primary requisite of stability and progress is a sound and equitable economic policy.

SECOND-HAND ACHIEVEMENTS

Two films, in a second-hand plane, refuted by another second-hand plane, have recently ended a continuous flight of nearly 247 hours in California. That is three days longer than human beings had ever flown before.

Not so long ago, two other airplanes, also in a second-hand plane, set an endurance record in Texas, flying for seven days. That record was broken in Cleveland. Meanwhile the California plane, the Angeleno had started on the endurance grind that was to eclipse all marks.

Aviation experts tell you to beware of second-hand planes, that the wood and metal deteriorate, that all sorts of things may happen. The terrific vibration and strain are easy to understand.

Therefore, these second-hand planes illustrate the enormous advance in aviation science within a short time. Ten years ago they couldn't have flown even a new plane for 247 hours, even if they would have. And they wouldn't have, even if they could. They would

have expected their machine to collapse, to fall apart in the air.

New and lighter metals, aluminum playing a big part, will be strengthened and used in future airplanes. And these endurance flights, spectacular now, will pay their dividends in lives saved by added security of flying.

INTELLIGENCE

Is the child of eight more intelligent than he will be at eighteen? asks the Ontario Department of Education.

At eight he is possessed of an insatiable curiosity and is asking questions, sometimes embarrassing questions. At fifteen he has been stuffed by his parents and teachers with the traditional rot that passes as answers to his curiosity, but about a great deal of which he has no curiosity whatsoever. As a result, that curiosity which lies at the root of all learning and all sciences has been deadened.

Present educational methods seem to stultify the natural process of learning. Questions are supplied and answers required, but curiosity is stifled. Without curiosity, questions and answers, especially when they are multiplied, become meaningless to a child and result solely in confusion.

Almost every child is intelligent. Every child from six to sixty will ask questions. Education depends on keeping the natural curiosity and the questioning instinct alive and the consistency of only supplying the proper answers.

Modern education seems to discourage this.

I. O. O. F. INSTALLATION

Mountain View Lodge No. 4, I. O. O. F., installed their officers last week for the ensuing term. Bro. Wm. Fleming, D.D.G.M., was the installing officer. The officers installed were as follows: J.P.G., R. W. Hamilton; N.G., H. Sutherland; V.G., F. LaBlond; Rec.-Sec., G. Parker; Ward, B. McNeil; Cond., W. Shield; R.S.N.G., H. V. Clarke; L.S.N.G., D. A. Carver; R.S.V.G., A. Little; L.S.V.G., E. McCreag; R.S.S., W. Andrews; L.S.S., J. Hartley; O.S.G., L. Dixon; L.S.G., L. Clarke; Chaplain, E. F. Brown.

Refreshments were served after the installation and meeting closed.

the strongest effects ever flashed upon the American screen.

The sequence depicts a mad stampede in the dead of night to the locale of a new and rich gold strike along the banks of one of the many creeks tributary to the Yukon.

This scene is one of the most numbing thrills of the great northern film epic which Clarence Brown directed for M.G.M. It follows a gambling hall scene where a drunken Swede is prevailed upon to disclose the location of his very rich strike.

Practically all of the five hundred miners gathered in the hall, a number of the dancing girls, gamblers and bartenders, join the stampede to file claims near the Swede's. In the dead of night they rush from the brilliantly lighted hall into the darkness.

Hundreds of flaming torches light their way in the mad race for the new gold fields.

This is but one of the great spectacular touches which Brown has injected into the film version of Robert W. Service's famous novel of the Klondike gold rush.

More than fifty well-known players are in the cast of "The Trail of '98," the leading roles being taken by Ralph Forbes, Dolores Del Rio and Harry Carey. Others who have prominent parts are Karl Dane, George Cooper, Tenen Holtz, Johnny Downs, William Orlamond, Edward Cosen and Emily Fitzroy. More than fifteen hundred extras appear in the mob scenes.

STRANGE TIBETAN RACE "ATMOSPHERE" FOR DIX FILM, "THE WHEEL OF LIFE"—MONASTERY OF BUDDHIST MONKS FAITHFULLY RE-CREATED BY RESEARCH MEN

A mysterious race of people, whose culture and customs are little known to the modern world—the natives of Tibet—the "Atmosphe" for Richard Dix's latest film, "The Wheel of Life," based on the successful stage play by James Bernard Fagan, which comes to the Empress Theatre for two days beginning on Wednesday, August 7th.

High up into the glacial slopes of Mount Everest, king mountain of the world, and into the secret recesses of the Buddhist monasteries of Tibet, where, according to Lamaism, their ancient wisdom in the light of guttering butter lamps, went the researchers who prepared for the filming of "The Wheel of Life."

Much of the action of the picture, takes place in a temple of the Buddhist lamas or high-priests, where only very recently have travelers from other lands and of other religions been privileged admission.

A large variety of stories and articles of outdoor life, fishing and hunting, well illustrated, combine to make a very attractive publication of the August issue of the national outdoor life magazine, Rod and Gun and Canadian Silver Fox News.

Among the favorite contributors having splendid features in this issue of the magazine are John Richmond, Bonnyville Dale, J. W. Winslow, G. P. Sladen, W. C. Motley, C. S. Landis, J. R. Mattern and F. C. Ness. Their various articles cover the outdoor field very thoroughly in interesting and informative style, particularly in angling and target and game shooting. The magnificent cover design by the well known artist, Major Allan Brooks, is itself worthy of special mention. Up to date developments in the silver fox industry are dealt with in the regular fox section.

Rod and Gun and Canadian Silver Fox News is published monthly by W. J. Taylor Limited, Woodstock Ont.

About all you can say for a long vacation is that you meet a new group of bill collectors.

The next little job for the expert in acoustics will be to attach an amplifier to the voice of conscience.

YOUNG & CO.

HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION—IS IT WORTH WHILE?

Is it worth while for Canada to save \$22,000,000 each year, which sum is a moderate estimate of the money value of the infant lives lost each year in this country?

It is difficult to place a money value upon human life, because, in the first place, it seems a cold and heartless thing to do. We rather resent the fact that anyone should think of our own children as having a dollar value. Then there are such human elements as mother-love expended upon a child which are beyond any measure of value.

If, however, we think of the question in an impersonal way, we do find certain interesting facts. It requires money to feed, house, clothe and educate a child. There is, as it were, an amount of money invested in every child. When the child grows to be an adult and begins to earn money, he then becomes an asset, and to the extent that he earns more than is required for his bare living, he is paying dividends upon the money invested in him.

An eminent American statistician, taking these points into consideration, has found that the value of a child at birth is over \$9,000. This sum invested would bring in the money required to rear the child and the net income of his earning years. Upon this basis which we believe is sound and reasonable, we find that the twenty-two thousand babies who die each year in Canada have an economic value of over \$22,000,000. This represents a drain upon our national resources to an extent which justifies national consideration.

Public Health work is not a matter of sentiment; it is essentially the expenditure of reasonable sums of money along certain established lines of proven value. Public Health work pays a dividend far beyond what is paid on any other investment. At least one-half of the \$22,000,000 now lost each year can be saved through providing the necessary public health services. Is it worth while?

Questions, concerning Health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by correspondence.

ROCKY MOUNTAINS—NATIONAL PARK

Through winding roads, midst state-ly trees.

Swayed to and fro by the balmy breeze, Wafting a perfume strangely rare, 'Tis a bit of heaven you enter there.

You travel on, through wondrous scenes— Past highest peaks and deep ravines, Snow-capped summits beckon you, And pine trees tower in the hazy blue.

Down in the depths of the deep ravines, You hear a roaring, rushing stream Throwing itself in whirling rage Against the sides of its stony cage.

You pause; for a vision rare you see, A lake as blue as the deep blue sea, Mountains and trees reflected there In the depths of this font of purity.

From the mountain tops the setting sun Whispers to the world that day is done; From its seat of a rosy golden hue, It bids to the world a sad adieu.

Mrs. P. Knice (nee) Mary Mensaghi.

Why diet? Width may save your life some day when a near-sighted driver thinks you are a truck.

WINTER SHELTER FOR FALL PIGS

ed equally into three lots. Seven were retained in a comfortable pig-pen, seven were wintered in straw-covered cabins outside, and the remaining seven were placed in a run with a straw pile for shelter. These pigs were fed the same ration throughout the one hundred and eighteen days on trial. At the conclusion of the trial the lot housed in the pig-pen had made an average gain of 1.0 pounds per day. The lot in the straw-covered cabins made an average gain of 0.90 pounds per day, and the lot allowed to run at the straw pile showed an average gain of 1.05 pounds per day.

It is obvious from the results at Indian Head, which cover a period of years, that fall litters (August and September) can be housed and fed quite economically in outside shelters. The main consideration is to keep sleeping quarters clean, dry, well bedded and free from unnecessary draughts.

Experimental evidence at Indian Head also indicates that August and September are the best months to have fall pigs farrowed, therefore, it is important in the production of two litters per year to plan matings accordingly. To insure best results the spring litters should be farrowed in March or early April to permit the breeding of sows for early fall farrowing.

During the fall and winter of 1928-29, twenty-one pigs were divid-

ed equally into three lots. Seven were retained in a comfortable pig-pen, seven were wintered in straw-covered cabins outside, and the remaining seven were placed in a run with a straw pile for shelter. These pigs were fed the same ration throughout the one hundred and eighteen days on trial. At the conclusion of the trial the lot housed in the pig-pen had made an average gain of 1.0 pounds per day. The lot in the straw-covered cabins made an average gain of 0.90 pounds per day, and the lot allowed to run at the straw pile showed an average gain of 1.05 pounds per day.

It is obvious from the results at Indian Head, which cover a period of years, that fall litters (August and September) can be housed and fed quite economically in outside shelters. The main consideration is to keep sleeping quarters clean, dry, well bedded and free from unnecessary draughts.

TAKING THE CROP WITHOUT THE BEE'S KNOWLEDGE

The method of taking off the crop, now developed by the beekeepers, disorganizes a hive as little as possible, this obviates robbing and will not interrupt the bees in their work; furthermore, it makes the work of removing the crop a great deal more pleasant because if carefully done, the bees need not be greatly disturbed.

This method is by using bee escape boards. These boards consist of wooden frames that just fit on top of a super or hive body. At two opposite corners on this framework are inserted bee escapes. These bee escapes allow the bees to pass through but, owing to the construction of the escape, they cannot return. The remainder of the escape board should be wire screening. Some beekeepers use a honey board with a single bee escape in the centre, in fact there are various types of escape boards, though they all work on the principle of the one described.

The escape boards are placed on the hives below the lowest super that it is desired to remove. Care must be taken that there be no brood in the supers placed above an escape. The bees will not leave brood. Care must also be taken that there are no chinks or holes in the supers above an escape for, as the bees leave through the escapes, the supers become unprotected and robbing may start. An empty super or half super is generally given when the escape is put on as the hive will become too crowded.

Only ripe honey should be put above an escape. Unfinished combs should be left below to be finished off by the bees.

If the weather is bright and the

bees are active it should be possible to take off the supers within twenty-four or forty-eight hours after putting on the escapes, and find no bees in them.

UNVEIL MONUMENT TO FATHER LACOMBE AT ST. ALBERT

St. Albert, Alta., July 22.—In honor of the man whom the Indians called "The Noble Soul," and "The Man With the Good Heart," and who has come to be known in history as one of the greatest pioneers in Western Canada, three thousand men and women gathered recently at the little town of St. Albert, nine miles out of Edmonton, on the Canadian National Railway. "For 67 years he labored for God, his men and his country," says the inscription on the base of the monument to Father Lacombe which was unveiled, and citizens, prominent in the affairs of the Northwest and of Canada itself paid a tribute to him as a man, a teacher, and a builder.

Born in Quebec in 1827, Father Lacombe came west in 1849 and built his mission at St. Albert nearly 60 years ago. To-day high on the hill and within a step of the old log church which afterwards became the cathedral, stands the life-size figure in bronze of the great missionary. With cross uplifted as in the days of his service among the Indians, Father Lacombe stands and looks down the valley. The statue was brought from France through the efforts of Rev. Father Jan, O. M. I., parish priest of St. Albert, assisted by prominent citizens and old timers in Alberta and by a group of patrons of which one of the most interested was Sir Henry Thornton, Chairman and President of the Canadian National Railway.

THE MACLEOD ELKS' CARNIVAL—SATURDAY—MONDAY TUESDAY—WEDNESDAY, AUGUST 3-5-6-7—BIG DOINGS DON'T MISS IT

The Macleod Elks are to be commended for their community and charitable spirit. Everybody knows the fine work they are doing as a community organization, they support everything in connection with the children and old folks. Every Christmas the Macleod Elks have given Christmas cheer to both the young and the old, as well as the needy. To carry on this good work they appeal to the community at large by way of an annual Carnival at which they give to the public a real fair and square deal, the goods given being all worth while and somebody gets something every time the wheel goes round. The dance hall run in connection with the carnival is well and properly conducted, the music being always good and snappy and it is one's own fault if they do not have a real time.

This year the Elks are giving, with each admission ticket purchased, the chance to win a 1929 Ford Coach. Also each admission ticket turned in at the main gate entitles the holder to a chance on the nightly prize. The car will be given away on Wednesday night, the last night of the carnival and everyone purchasing an admission ticket is eligible to win it.

The Macleod Elks are out to make this year's Carnival bigger and better than ever and we are satisfied that the committee in charge will leave no stone unturned in making it such. These Carnivals are well conducted and the cause is a worthy one. All money is spent on charitable and community work, and is well worthy of the support of the whole Macleod district.

Be a booster for the Carnival and buy an admission ticket—you never know your luck—Whoopie!

CANADIAN NATIONAL TAKE OVER FLIN FLON RAILWAY

Winnipeg, Man., July 29.—The Manitoba Northern Railway, popularly known as the Flin Flon Railway will be completed and turned over to the Canadian National Railways for operation about the end of July.

The construction of this branch line, quite apart from the role it was designed to play in the development of the mineral resources of the northern portion of the province, added an interesting chapter to the highlights of the transportation history of Canada. The line, approximately 88 miles long, was begun with the awarding of the contract to the Dominion Construction Company, Toronto, and W. S. Tomlinson, Winnipeg, on December 2nd, 1927, and the last spike in the skeleton track was driven on Sept. 22nd, 1928, by the Hon. John Bracken, Premier of Manitoba.

To accomplish this record in railway construction through difficult country and in face of severe winter conditions the contractors laid steel on the frozen muskeg for the first fifty miles. This was followed by grading in the spring and summer when the track was lifted to sub-grade and the few shallow cuts reduced at the same time. For the following thirty-eight miles the rock formation encountered permitted the usual practice of building the grade first and following the track as the grade was ready to receive it.

As quickly as the track was laid, operating facilities, telegraph line, buildings, etc., were erected and one year from the date of the signing of the contract the Hudson Bay Mining & Smelting Company was able to commence transporting the heavy machinery for equipping its plant at the end of the line.

Watch for the "News" each week. Suggestions and news items invited.

Claude Tweed, Editor

When pouring jelly into glasses put a few chips or flakes of paraffin in the bottom of each glass and pour the jelly on top of them. The hot jelly will melt the paraffin which causes it to rise and seal the glass better than when the paraffin is melted and poured onto the jelly.

Some folks think that a binder is a binder, but let us tell you that a real grain binder is a McCormick-Deering.

A cataraft in Yellowstone Park is worth two in the eye.

Next time you are in town drop in and look over the McCormick-Deering Side Delivery Rake and Tedder. It is a favorite with the big hay growers and we can quickly show you why.

"What line did you say you were in?"
"I manufacture face powder that can't be kissed off."
"Who has charge of your proving ground?"

Roller bearings in the principal friction points make the McCormick-Deering Side Delivery Rake and Tedder easy to operate and increase its life.

A loving husband broke one of his phonograph records the other night and his wife told him "that was the only record he ever broke." Now he doesn't know whether he was being complimented or bawled out.

A sweep rake has hard, heavy

work to do, requiring rigid, sturdy construction. McCormick-Deering Sweep Rakes meet these requirements perfectly. That is one reason why these rakes are so popular hereabouts.

Little Edgar visited for the first time his aunt in the state of Maine. Noticing the troubled look on the lad's face, she asked him what was the matter.

He replied: "On my goggerphy map Maine is a red state." McCormick-Deering Sweep Rakes can be purchased with seat lift, manual lift, or power lift. Ask us to explain the merits of the various types which we can offer you.

Need a new hay stacker? We have the McCormick-Deering line of stackers, including over-shot, and swinging types. You can find exactly what you need here.

The McCormick-Deering Overshot Stacker is a substantial machine for general work. It builds stacks of medium height, is well made, and will give you years of good service. Ask any owner about these stackers.

With a McCormick-Deering Harvester-Thresher you can successfully harvest and thresh wheat, oats, barley, rye, flax, and similar crops, and save as much as 20 cents a bushel over other harvesting methods.

The complete McCormick-Deering Harvester-Thresher line includes 10, 12 and 16-foot machines for use in level fields and 12 and 16-foot machines for hillside harvesting.

Raspberries

We recommend that you get your Raspberries within the next week. Ours come from Harrop, and are well worth any extra cost, as a comparison will readily demonstrate. They weigh much more than the average pack and are extra large berries.

APRICOTS

If you haven't gotten your Apricots don't delay longer, as they are fine now, and won't last much longer.

THE WHITE HALL

LOCAL AND PERSONAL NEWS

Mr. and Mrs. T. B. Armstrong and family were visitors at Calgary and Banff during the past week.

J. D. Matheson returned Monday from a trip to New York and other Eastern points.

Mr. and Mrs. F. J. Butler and Mr. and Mrs. Art Burns of Lethbridge left Thursday morning on a motor trip to the Pacific Coast.

Betty Mackintosh, daughter of Mr. and Mrs. Thos. Mackintosh of Vancouver, formerly of Macleod, is visiting in Macleod and district. She is the guest of Miss Margaret

Swinerton, her old school mate, for the week-end.

Bill Watson of Edmonton, formerly of Macleod, is a business visitor here this week.

Dr. Fanset and son, Jack, returned on Friday night from a holiday spent at Rolla, B. C., in the Peace River country.

A. E. Torrie, M. A., of the Edmonton Normal School is spending a short holiday with Mrs. Torrie's father, Hiram Bates, McBride Lake, and three hundred acres of this crop. Macleod. James, his eldest son, accompanied him and will stay with his

grandfather on the farm till the opening of the University in the Fall.

C. Hughes of the Empress Theatre returned on Sunday from a motor trip to Winnipeg and other Eastern points.

Mr. and Mrs. R. Cunningham and son Grant, returned on Thursday from a delightful auto trip visiting Western States and Coast Cities.

T. O. A. Drinkwater of Burdett was a week-end visitor in Macleod the guest of his father, E. Drinkwater.

Mr. and Mrs. A. J. Lang and son, Jack, and Miss E. Philips, who have been guests of Mr. and Mrs. Wesley Shield, have returned to their home in Saskatoon.

J. T. Lochend returned on Thursday morning from Calgary, where he was receiving medical treatment. Mr. Lochend had a stroke a few weeks ago but is now slowly recovering and able to be home again.

Mr. and Mrs. J. E. Slimmon and family of Shaunavon, Sask., who were the guests of Mr. and Mrs. T. B. Armstrong in Macleod, left for their home on Thursday last. Mrs. Slimmon is Mrs. Armstrong's sister.

Gordon McLeod left for New Dayton on Wednesday, where he will resume his duties with the Pool Elevator at that point after having spent his holidays at his home in Macleod.

Mr. and Mrs. H. F. Strinsky, Miss Louise Peers, George Gilker and Ernie Young spent the week-end in Macleod on their way back to Calgary after spending a two weeks vacation at Waterton Lakes.

The Mennonites at Stand Off, between the rivers, started cutting Fall Wheat on Monday and from the reports to hand the crop has matured in splendid shape and it is anticipated will produce at least 40 bushel to the acre. They have between two and three hundred acres of this crop. Other Fall wheat in the Macleod district will be ready for the binder

this week all promising a good yield, with no damage reported.

Mel Dean, accompanied by Miss Marjorie Dean, Miss Jenny Barr and Master Freddie Dean left on Tuesday for a motor trip to Banff.

Bill Townsend, who has been spending a holiday with his brother, Ralph in Macleod returned to Calgary last week-end.

Miss Gladys McNab, who has been visiting at Charesholm, returned home on Monday and will spend several weeks visiting her parents Mr. and Mrs. W. H. McNab.

Mrs. R. A. Clement of Macleod and her young son, Allison, are spending a holiday at the Coast, the guests of Dr. and Mrs. Elder, formerly of Macleod.

Mr. W. H. McNab left Monday morning for the coast with Messrs. P. B. Hambley and W. R. Chamberlain, who had been his guests in Macleod.

Miss Rachel McLeod, who is in training at the Holy Cross hospital, Calgary, is spending her holidays in Macleod with her parents, Mr. and Mrs. Alex. McLeod.

Mr. and Mrs. John William's and son, Allan, of Calgary were week-end visitors at the home of Mr. and Mrs. Wesley Shield. Miss Margaret Shield accompanied them back to Calgary.

Mr. and Mrs. J. Morrison of Vancouver and their two little girls are spending a few weeks in Alberta visiting Mrs. Morrison's brothers and sisters. This week they were the guests of Mr. and Mrs. Hugh Mackintosh. Before her marriage Mrs. Morrison was Bella Mackintosh and was well known in Macleod.

As more of an experiment four settings of eggs from thoroughbred White Leghorn hens, the property of W. Forsyth, Burnaby, B. C., were sent to Japan for hatching. From two settings of 15 eggs each 15 chicks were hatched from each setting and from the other two settings of 15 eggs each 14 chicks were hatched from each setting and all

were healthy and strong. The President of the B. C. Poultry Association said this was remarkable for this country and more so in Japan, considering the long ocean voyage and the different changes of climate. The president in remarking on this wonderful feat said that no doubt the high grade of thoroughbred stock handled by Mr. Forsyth had a lot to do with it. Mr. Forsyth conducts one of the most up-to-date poultry farms in B. C., last year installing an electrical incubator capable of handling 20,000 eggs at one time. Mr. Forsyth will be remembered by many Macleod people as manager of the Bank of Montreal here in Macleod several years ago.

Antonia Mousir, of Dutchess, Alberta, spent Sunday at Macleod as the guest of his wife, who is Chef at Dilly's Cafe.

Mr. and Mrs. A. T. Leather have returned from an extended holiday trip visiting friends at Nanaimo and Skagway. They report a most enjoyable holiday.

Wednesday, July 31st, has been the hottest day in Macleod this season. According to Staff-Sergt. Webb the record at the Barracks was 99 in the shade. The very hot wind blowing from the West will be damaging to the crops.

Mrs. James Kirkland had for her guest during the past week, Mrs. Houghton and little boy of Medicine Hat. Also Mrs. Houghton's parents from Blairmore on Saturday. Mr. Kirkland motored to Medicine Hat on Sunday and took Mrs. Houghton home.

Miss G. Frey, who has been teaching at Glenwillow school, left on Friday for Barons and Pincher Creek to spend the remainder of the school holidays. Miss Frey is not returning to Glenwillow, very much to the regret of the pupils and parents.

The Old Man River behind the Customs House is the rendezvous for the young people of Macleod these hot days and dozens of boys, girls, young men and young women are sunbathing in the cool waters and getting a nice brown color from the hot sun.

UNITED CHURCH SERVICES

Services Sunday, Aug. 4th, 1929:
11 a. m.—"Punishing The Innocent."
Children's Story—"The Knotted Handkerchief."
12:15—The Church School—"Belshazzar's Banquet." A most interesting study.
7:30 p. m.—"Progress by Faith."

(If the heat continues we will meet on the Manse Lawn).
Rev. J. F. Knight, M. A., B. D., Pastor.

ST. ANDREW'S PRESBYTERIAN CHURCH

During August there will be one service each Sunday at 7:30 p. m. Mr. Wood, student, will preach every evening during this month while the Pastor Rev. A. Ferguson, M. A., is absent on holiday.

CHRIST CHURCH (ANGELICAN)

Services Sunday, Aug. 4th, 1929:
8 a. m.—Holy Communion.
11 a. m.—Holy Communion and Address.
7:30 p. m.—Evangelism and Sermon.
Rev. F. Randall Powell, Rector.

Prohibition works all right. The growing indifference to oratory is proof that the country is sobering up.

THE FORD CAR REAR AXLE

Expense no object in Achieving Perfection

THE rear axle of the Ford car is of the three-quarter floating type with spiral bevel gear. The pinion hub is exceptionally heavy, and, as the pinion is carried on double taper roller bearings, perfect alignment of the gear is always assured. The rear axle has a total of four roller bearings which add considerably to the cost of manufacture but are a protection for the owner against wear.

Special care is taken to insure silence in the pinion and ring gears. These are made up in sets and carefully matched, each set being run in to eliminate all possibility of noise in operation.

The differential side gears are forged integral on the rear axle shafts and the teeth then cut. This permits of lighter and more simple construction. The shafts are unusually strong, and, as the centre line of the wheel comes over the bearings, there is no overhang of the axle shaft, and it has no weight to support.

The use of malleable castings is eliminated in this new axle housing which is made entirely of steel. Bell forgings welded to steel tubing make up the shaft housing which is bolted to an all steel differential housing. The care and skill devoted to the manufacture and assembly of rear axle parts is typical of the high standards of Ford engineering.

Arrange for your demonstration ride with the nearest Ford dealer
